SUMMARY

Full-stack developer with 5+ years of experience across React, Next.js, Node.js, and TypeScript. I've built production systems at scale — on-chain data indexers, microservices, data engineering pipelines, and LLM-integrated desktop apps. I use AI tooling daily, including agentic coding workflows, and have hands-on experience integrating OpenAI, Anthropic, Gemini, and Ollama into real products. Currently completing an MSc in Computer Science at IU International University of Applied Sciences (Berlin), focused on distributed systems and backend architecture. Looking for a full-time role in backend, full-stack, or infrastructure engineering.

EXPERIENCE

Senior Full Stack Developer

DefiEdge 10/2022 - 10/2024 Remote

- Led a platform revamp (Next.js/React/Tailwind, Node.js) on a DeFi protocol managing \$20M TVL and \$7.8B+ in cumulative trading volume.
- Published and maintained The Graph subgraphs for on-chain data indexing across 6+ networks with automated redeployment on push — reduced page load from 4-5s to 200-300ms.
- Broke a monolithic backend into separate services, cutting response times and making deploys safer.
- Contributed to open-source integrations including DefiLlama and Zapier; published internal tooling as open npm packages.

Full-stack Developer

J's Business Solutions 08/2021 - 10/2022 Remote

- Rebuilt Maple Finance's marketing site (Next.js/TypeScript, Contentful CMS, GraphQL, AWS) — CMS integration let the content team publish and edit pages in real time without dev involvement, cutting update turnaround from days to minutes.

Founding Software Engineer

Rethynk Tech Private Limited 04/2021 - 12/2021 Mumbai, India

- Built Eatabl end-to-end (Nuxt.js, Node.js/Express, MongoDB, Heroku) from a blank repo — launched live with 20+ restaurants and 100+ active users.

Full-stack Developer

Freelance 09/2018 - 07/2021 Remote

- Built and shipped full-stack apps for 4+ clients across DeFi, NFT, and e-commerce domains using React/Vue and Node.js.

PROJECTS

AI Resume Builder

03/2026 - Present

Local-first desktop app (Next.js, Tauri, SQLite) that parses job descriptions and generates tailored resumes and cover letters via LLM. Features a natural-language chat assistant for real-time edits, ATS guidance, and interview prep. Integrates OpenAI, Gemini, Anthropic, and Ollama for offline workflows — with token-usage analytics and secure API key management per provider.

WeatherInsight – German Weather Data Platform

02/2026

Ingested raw DWD weather data and exposed 67 engineered features via REST API. Pipeline: Python + Spark + Airflow → MinIO → PostgreSQL. FastAPI with auth and rate limiting on the serving layer, Prometheus/Grafana for observability, full Docker Compose setup. 159 tests, 85% coverage.

Local Media Discovery (Privacy-First Media Feed)

01/2026 - 03/2026 pranavraut033.github.io/local-media-discovery-app

Built a local-first media app that turns a personal photo/video library into a ranked, swipeable feed — no cloud, no telemetry. Fastify backend, Next.js frontend, BullMQ for background indexing, rclone for remote sources, PIN-based multi-user auth. Ships as a PWA accessible across the home network.

WebSecScan (Automated Web Security Scanner)

12/2025 - 01/2026 web-sec-scan.vercel.app

Open-source scanner that detects OWASP Top 10 vulnerabilities via static analysis and dynamic testing. Risk-scored 0-100, real-time scan logs via SSE, HTTP header/cookie analysis, authenticated scan support. Built with Next.js/TypeScript and Prisma; live demo and docs published.

EDUCATION

Master's degree, Computer Science

IU International University of Applied Sciences

01/2024 - 12/2026 Berlin, Germany Grade 1.83 / 5

Bachelor of Engineering - BE, Computer Science

MCT's Rajiv Gandhi Institute Of Technology

01/2016 - 12/2020 Mumbai, India CGPA 7.42 / 10

Higher Secondary Certificate, Computer Science

Pirojsha Godrej Junior College

01/2014 - 12/2016 Percentage 78.8 / 100

PUBLICATIONS

Recognise Object for Visually Impaired Using Computer Vision

IJRTE - International Journal of Recent Technology and Engineering

02/2020

https://www.ijrte.org/wp-content/uploads/papers/v8i6/F9579038620.pdf

Object detection with YOLO + K-means colour extraction with audio output for visually impaired users.

SKILLS

Languages & Frameworks

TypeScript, JavaScript, Node.js, Python, React, Next.js, Vue.js, Nuxt.js, Express, Fastify, PostgreSQL, MongoDB, SQLite, Redis

DevOps & Infra

Docker, Airflow, Spark, MinIO, Prometheus, Grafana, AWS, Heroku Tools, Prisma, BullMQ, GraphQL, REST APIs, GitHub Actions, Vercel, Digital Ocean

AI & Developer Tooling

GitHub Copilot, Claude, VS Code AI extensions, agentic coding workflows, OpenAI SDK, Anthropic SDK, Google Gemini SDK, Ollama (offline LLM)
